

Shaptak Naskar

Full Stack & Android Developer

Kolkata, India | ddtectiv.ddip2017@gmail.com | linkedin.com/in/shaptak | github.com/ShaptakNaskar | sappy-dir.vercel.app

EDUCATION

Greater Kolkata College of Engineering and Management

Bachelor of Technology – Computer Science; GPA: 7.20

Kolkata, India

August 2022 – July 2025

Engineering Institute for Junior Executives

Diploma – Electronics and Telecommunication; GPA: 7.80

Kolkata, India

June 2019 – August 2022

TECHNICAL SKILLS

Languages: Python, JavaScript, Dart, Bash

Frameworks & Libraries: React, Node.js, Express.js, Flutter, React Native (Expo), Riverpod, Tailwind CSS, Socket.IO

Databases & Cloud: MongoDB, MySQL, Firebase, Vercel

AI Engineering: speech-to-text pipelines (Whisper v3 via Groq), LLM structured-output workflows (OpenAI, GPT-OSS-120B), AI document/invoice parsing, lead classification & enrichment

APIs & Integrations: Google Workspace APIs (Gmail, Drive, Sheets), OAuth 2.0, REST API design, realtime messaging (Aby, Socket.IO)

Systems & Platforms: Linux & Windows administration, Android app signing & Play Store deployment, Git, GitHub, Vercel serverless

EXPERIENCE

MindEdge Solutions

Nov 2025 – Present

Junior Software Developer (Apr 2026 – Present) · AI Project Intern (Nov 2025 – Mar 2026)

Kolkata, India

- Built an **AI Meeting Summarizer** (Groq Whisper v3 + GPT-OSS-120B) that turns audio/video recordings into minutes of meeting, transcripts, and action items; processed **200+ meetings**, compressing a 30-minute session into ~2 minutes of reading — a **~93% reduction in review time**.
- Shipped an **AI Lead Generator**, a multi-tenant B2B sales-automation SaaS — classifies inbound Gmail leads, scrapes prospect websites, and auto-sends personalized proposal PDFs; **processed 600+ leads** at MindEdge alone at a pace of **~60 proposals/month**, with an outbound module that fields routine pre-sales queries without human involvement.
- Delivered **Factory Portal**, a factory QC & costing management suite (Express, MongoDB/MySQL, React Native app) live in production at a sister company — centralizes QC checklists, proforma invoices, and document storage across **20+ active projects**, with AI-parsed invoice line items and automated PDF report generation.

PROJECTS

Hanamimi | Flutter, Dart, Riverpod | github.com/ShaptakNaskar/hanamimi

- Android music player with a real-time FFT audio visualizer, crossfade/gapless playback, synced lyrics, background media session, and a four-theme animated design system built on Riverpod.
- Extended with an online layer: music-taste compatibility matching, realtime shared-listening rooms (Aby), listening-stats leaderboards, and end-to-end encrypted library backups.

WeatherMan | Flutter, Dart, Android, Open-Meteo API | github.com/ShaptakNaskar/weatherman

- Glassmorphic Android weather application inspired by iOS Weather UI; integrates Open-Meteo forecast and air-quality APIs with smooth animations and a modern design system built with Flutter.

CERTIFICATIONS & TRAINING

30-Hour Cybersecurity Training — Ardent Computech Pvt. Ltd., Mar 2024. Threat detection, encryption, secure networks, and vulnerability mitigation.

30-Hour AI & ML with Python Training — Ardent Computech Pvt. Ltd., Mar 2024. Data processing, model training/deployment, predictive analytics with NumPy & scikit-learn.

Cybersecurity Virtual Internship (10 Weeks) — AICTE, Feb 2023. Ethical hacking, firewall configuration, incident response, and enterprise security tooling.
